

## SUBMIT YOUR TAX DOCUMENTS VIA APP

Take advantage of the opportunities in the digital age. For easier collaboration, we recommend "Snap.Share".

Dear Sir or Madam

With Snap.Share, it is possible to digitize documents via QR code with your mobile phone and send them to the Expertinum team.

The **procedure** is quick and intuitive, with only three steps:

1. scan the QR Code
2. make a photo
3. send the document

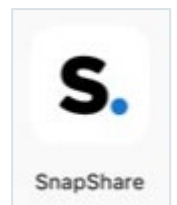

The app is secure and works without any registration. You do not need to remember any login information, and because no data is stored in the app, confidentiality is maintained.

The **advantages** of Snap.Share:

- Mobile digitalization of documents via smartphone camera
- Easy handling
- No registration, no login required
- Automatic assignment of sent documents to your tax dossier, through your specific QR code
- Electronic transmission of the completed dossier to the tax office (if the respective canton already allows this, which will increasingly be the case in the future)
- End-to-end encryption & secure transmission

**Do you want to start now?**

The Snap.Share app is available for free for [iOS \(App Store\)](#) and [Android \(Google Play Store\)](#). All you need is an Apple smartphone (iOS version 11.2 or later) or Android smartphone (Android version 5.0 or later) with a camera, as well as the QR Code we provide - generated individually for you.

Get in touch with your point of contact at our company.  
We are looking forward to digital cooperation with you.

Kind regards

**Your Expertinum-Team**

P.S.: Further information about the app and on topics such as data protection: [www.snapshare.ch](http://www.snapshare.ch).
